EDUCATION

Galgotias University
MCA

June 2026
CGPA: 8.1/10.0

SKILLS

Languages: JavaScript/TypeScript, HTML/CSS, C++
Tools: Git/GitHub, Linux, Webpack,Vite ,VS Code, Atom
Frameworks: React.js, Node.js, Nest.js, Next.js ,Material-UI , TailwindCss , Bootstrap
DevOps: AWS , Docker , ServerLess
Databases: MongoDB , Redis , SQL

EXPERIENCE

MOBCODER | *SDE-2 [Full Stack developer]*

Jan. 2022 – Present

My responsibilities include designing and implementing scalable and efficient solutions, collaborating with cross-functional teams, and ensuring the seamless integration of features.

- **Desyr** | *Next.js, React.js, Node.js, MongoDB, Docker [Full Stack Developer]*
 - * Implementation of the entire frontend architecture for Desyr with robust API design, ensuring a seamless and visually appealing user experience.
 - * Achieved remarkable improvements in website performance, as evidenced by Lighthouse Performance Report. Elevated best practices score to 100 and SEO score to 98 and boost of 78 in desktop and laptop performance. Additionally, optimized mobile responsiveness, enhancing performance by approximately 40
- **Fedora** | *Node.js, MongoDB [Back-End Developer]*
 - * Fedora is a cutting-edge banking app that stands out by offering user-friendly access to loans.
 - * Implemented robust end-to-end encryption that guaranteeing secure interactions within the app and Created Secure and Scalable Backend
 - * Used best techniques like graceful shutdown, file compression,caching,and automatic database backups to make the backend system more robust , Swagger used for documenting the APIs
- **HRM (Human resource management)** | *Node.js ,Redis, MongoDB [BackEnd developer]*
 - * Implemented interview scheduling which involved integrating users' Google Calendars with our system, allowing users to create and add participants to meetings, with the google meeting link automatically added to their calendar on the selected date. Additionally, all participants receive email invitations.

PROJECTS

Hotstar clone | *React.js,Node.js,TailwindCSS,Cloudinary*

May 2023

- Developed a full-stack web application, This application offers users a seamless experience to watch movies, write reviews, and access comprehensive information about the cast.

Blog App [MicroServices] | *Node.js, React.js, MongoDB, Docker, AWS, Kubernetes, Skaffold*

Aug. 2022

- Designed the microservices to scale horizontally to accommodate increased traffic and ensure resilience against failures, enhancing the overall reliability of the application, and ensuring high availability and scalability.

Error handler [NPM Package] | *Node.js, TypeScript*

Aug. 2022

- I expanded my knowledge to TypeScript and created an error handler npm package. This package is now live and available for use, contributing to the quality and robustness of our projects.

ACHIEVEMENTS/CERTIFICATION

- [NamasteDev React By Akshay Saini](#)
- [The Ultimate React Course 2023 By Udemy \[Jonas Schmedtmann\]](#)
- [M320 MongoDB Data modeling](#) , [M150 Authentication and Authorization](#), [A131 Intro to MongoDB Charts](#), [M201 MongoDB Performance](#)
